

Saccardo GCF S.r.l. designs and manufactures electric motors and electrospindles for machine tools. The company, founded in the sixties, is now consolidated and international leader thanks to its product and an organization, developed over the years, that aims to satisfy the customer through a complete service, following the customer from the partnership and co-design relationship for the study of customized solutions, up to the after-sales service with assistance, maintenance and supply of spare parts where necessary.

A quality management system compliant with UNI EN ISO 9001:2015 and any "Amendments" is considered a winning feature to strengthen the company's image and its implementation allows, in accordance with the legislation and binding regulations, to operate with competitiveness, safety and efficiency through:

- Plan company objectives
- Identify strategies to reach them
- Constantly improve company processes
- Promote a culture oriented to continuous improvement
- Aim to reach even higher quality standard
- Raise its employees' awareness
- Involve suppliers and external collaborators
- Monitor progress
- Define mitigation actions for the effects that climate change may have on our Organization
- Monitor the impact that work activity and the product have on the environment
- Define improvement actions
- Assess emerging new technologies, to identify innovative, economically sustainable solutions to apply

The general management of Saccardo GCF S.r.l. is committed to ensuring that this policy is divulged and understood by the organization, as well as communicated at all levels.

For this reason, it is committed to involving and raising awareness among all staff, providing training where necessary, maintaining a peaceful, welcoming and organized working environment that is at the same time healthy and safe, with adequate and up-to-date equipment and resources.

It is essential to carry out a context analysis, identifying the requirements, risks, opportunities and best strategies.

This policy is intended to be reviewed and updated according to the evolution of the results, the needs of the market, customers and its collaborators, as part of the periodic management reviews activity.
